

# Devin Sharpe

## Full Stack Software Engineer

Atlanta, GA

(943) 214-8483

devin@devsharpe.io

Passionate software engineer dedicated to bringing great software to users through clever and collaborative means

## Work Experience

---

### Frontend Software Engineer

The Washington Post / Washington, DC (Remote)

Apr 2022 – Feb 2023

Research and Experimental Design / Commercial Engineering

- Successfully executed maintenance and integration of novel features into ad engineering and templating applications.
- Collaborated closely with product designers to implement cutting-edge ad formats and templates.
- Actively researched innovative technologies and identified opportunities for enhancing ad interactivity and user relevance.
- Actively participated in and supported an organizational transition to Scrum practices during an extensive migration process.

### Full Stack Software Engineer

Priority1 POS / Buford, GA

Jul 2018 – Apr 2022

- Effectively maintained and collaborated on a multitude of web applications, catering to both internal and client needs.
- Designed and developed over 10 applications, utilizing a diverse range of technologies and deploying them across multiple environments.
- Played a pivotal role in enhancing internal efficiency by automating various tasks through Python and NodeJS with Typescript.

## Projects

---

### Birb – Simple Social

- Innovatively crafted and implemented a variety of features that enabled users to share content and photos with their friends, prioritizing a healthier and more manageable approach.
- Conducted extensive experimentation with edge serverless environments, carefully balancing the trade-offs between developer experience and application performance.
- **Tech Stack:** React/Next, TRPC, Typescript, Drizzle ORM

### T3 + DLC

- Expanded the popular T3 NextJS stack by incorporating a selection of my preferred libraries and features.
- Developed a monorepo structure specifically tailored for efficiently creating new applications, with a primary focus on exceptional developer experience and optimal performance.
- **Tech Stack:** React/Next, TRPC, Typescript, Drizzle ORM, Clerk Auth, Turbo

## Familiar Technologies

---

- |              |           |                       |
|--------------|-----------|-----------------------|
| ○ Typescript | ○ SolidJS | ○ Playwright          |
| ○ React      | ○ Python  | ○ Cypress             |
| ○ NextJS     | ○ Django  | ○ Jest                |
| ○ Redux      | ○ Express | ○ CSS, SASS, Tailwind |
| ○ Vue 2      | ○ NodeJS  | ○ SQL & NoSQL         |
